

To all Members & Affiliates:

Thank you for your patience and understanding during these past few months. The overwhelming volume of Member registrations and applications in our pre-launch period created the needed freeze on operations for more stringent organizational structuring to meet all necessary compliance requirements, all of which are now in place.

We feel confident that the implemented infrastructure and system upgrades developed will support the volume of applicants presently in hand and the exponential volume once we invite future membership. Present member files not granted a WOW ID# will be processed for back office registration to be offered to each team leader. Member protocols for communication and customer service will keep all parties clearly connected. Communication is the key to successful operations, and our commitment is for all members to receive the highest level of service which will ensure long-term success for WOW.

The WOW management team is pleased to report our first applicant, privacy will always prohibit name disclosure, has been fully processed and is now in the closing phase to validate all funding protocols, and will be under audit with our legal counsel evaluation to assure proper state and national compliance. Upon the written legal counsel affirmation, we will establish the closing scheduling for the active members so we can establish a viable scale of servicing.

We remain adamant that you **MUST** Stop all group meetings and networking of members as we must avoid confusion and erroneous representations. Only official company updates on official websites are authorized through direct member email and back-office postings, therein the company shall **NOT** be responsible for unauthorized updates or meeting presentations as they remain prohibited.

Thank you for your patience, support and understanding.

WOW Management
